EDUCATION

Sheridan College

Honours Bachelor of Information Sciences (Cyber Security)

Cumulative GPA: 3.77/4.0

Relevant Coursework: Data Analysis, Software Engineering, Systems Security, Algorithms, Artificial Intelligence

Oakville, ON

Expected May 2028

WORK EXPERIENCE

Stoch Analytics (8-employee venture-backed startup)

Toronto, ON

Software Developer Intern

Summer of 2025

- Built a cross-platform desktop web app with Electron, Typescript, HTML, and CSS, delivering a polished UI for internal analytic workflows.
- Engineered Python data-processing scripts and workflows to compress large client datasets by large ratios while preserving analytic fidelity.
- Assisted with cloud pipeline configuration and other security-related tasks under the CISO, strengthening basic cloud security posture.

Oliver Wyman

New York, NY

Consulting Intern

Summer of 2024

- Automated a recurring client process, reducing task time from ~30 minutes to ~5 minutes via scripts and documentation, improving operational efficiency.
- Used JSON dictionaries and Excel to extract, compare, and validate API and insurance data, enabling faster and more accurate implementations.
- Worked directly with clients and internal teams, tracking and resolving issues in time-sensitive, client-facing environments.

Oliver Wyman

Toronto, ON

Software Developer Intern

Summer of 2023

- Contributed to an Electron app using JavaScript, Python, HTML/CSS, focusing on front-end development and UI/UX.
- Implemented a “Meko Chart” Interface and variable-renaming feature for Excel-based workflows, improving usability and reducing manual updates.

Oliver Wyman

Toronto, ON

Data Analyst Intern

Summer of 2022

- Optimized SQL Server queries and data handling to improve system validation rates by approximately 40-50%.
- Partnered with actuaries and clients to reconcile data issues and support large migration and reporting projects.

UNIVERSITY PROJECTS

GitHub Projects

Nov 2024 – Present

- Malware Research: Created and analyzed custom malware samples for analysis, studying evasion and detection techniques.
- Portfolio & Quiz Web Apps: Developed a personal website plus a quiz hosting platform using modern web technologies.

ACTIVITIES

CTF Competitions

Toronto, ON

Competed in 6 Events (placed above top 50% in all events)

Feb 2025 – Present

- Developed fundamentals in OSINT, reverse engineering, web security, crypto, and more.
- Created original challenges for peers to solve, enhancing problem design skills.

ADDITIONAL

Technical Skills: Advanced in SQL, PHP, JavaScript, HTML/CSS, Python, C/C++, 8086 Assembly, Microsoft Office Suite, Cybersecurity Tools (Wireshark, Ghidra, Burp Suite).

Certifications & Training: CompTIA Security+ (in-progress) | Completed Cyberstart program (TryHackMe).
